

Enable Business Continuity

With Covenir's Remote Print Automation & Virtual Mailroom

Many challenges can prevent access to your office.

Wildfires can force evacuations and threaten your physical property.

Storms and floods can also cause evacuations and property damage.

Protests and civil disorder can prevent building access.

Pandemics can prevent your workers from going into the office.

Yet, the insurance business never stops.

In times of crisis, timely communication is more important than ever.

Incoming mail must be collected and processed.

Outgoing communications must be printed and mailed.

Delays result in policyholder dissatisfaction and compliance issues.

Develop an airtight business continuity plan now – before disaster strikes.

What happens if your team can't go into the office? What if your local printer requires files you don't have – or they're closed because of the same issue that forced your office to close? Covenir can help.

Receive inbound mail & checks ... even when your team is not in the office.

Our **Virtual Mail Room** receives your paper mail at a designated PO Box, transforms it into digital artifacts and delivers it to your system.

If you choose our intelligent lockbox service, we receive and process mail and checks according to your rules. We can even upload documents to your system and start workflows if needed.

Enable your remote team to send mail quickly, efficiently and compliantly.

Our **Remote Print Automation** enables your team to trigger print/mail processes from anywhere. You tell us what to send and we make it happen.

Our barcode technology ensures that every piece of mail is processed according to its requirements – including proof of mailing. We can upload digital copies of mail to your system or send them to you in batches.

Be ready before the next disruption.

With Covenir's Virtual Mail Room and Remote Print Automation, your communications never stop. Contact us to learn more.
